Hand Grips – Heated

HEATED HAND GRIPS
Keep comfortable on those cool mornings or frigid night rides. Warm hands have a major impact on overall body comfort and sometimes gloves just aren’t enough. These thermostatically controlled grips feature variable heat settings controlled with a military-grade resistor and use automatic temperature monitoring to adjust to ambient temperatures. With both hands on the grips, they will remain at a constant temperature regardless of changes in outside temperature. The self-contained control circuit and control knob means you have no additional switches or controller boxes to mount and the grips are switched on/off with the ignition to avoid draining your battery. The glueless grip design allows grip removal if you change handlebars or motorcycles.

COMFORT, STYLE OR BOTH?

Every person is unique. Your overall height, arm reach, upper body length and riding style all dictate your relationship to the bike’s controls. Add in the desire for a unique, custom look and your handlebar options multiply exponentially.*

REACH™ HANDLEBARS

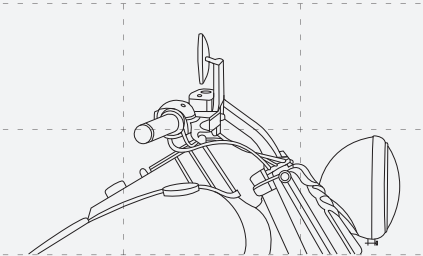

Recommended for shorter riders, Reach™ Handlebars are shaped to position the hand controls closer to the rider for optimized elbow and wrist position.

TALLBOY™ HANDLEBARS

Recommended for taller riders, Tallboy™ handlebars enable long-armed riders to more comfortably fit and maneuver the motorcycle.

YOUR RIDING POSITION

DRAG HANDLEBAR*

Narrow, flat and more aggressive, drag bars provide a straight elbow and neutral hand and wrist position. For maximum comfort, drag bars can be positioned with curved or straight risers to minimize stretch to the controls.

BEACH HANDLEBAR*

Low and wide, a beach bar spreads your arms and gives you room to breathe. Ideal for the rider with long arms, beach bars can be a little too wide for many riders. While selecting a bar, make sure you can reach the hand controls when the handlebar is fully turned.

APE & TALLBOY HANDLEBAR*

Tall and wide, ape and Tallboy™ handlebars provide a classic “fists-in-the-wind” look and can add long-haul comfort for riders with long arms. Because handlebar height is regulated in many areas, check local laws before installing a tall handlebar.

CHIZELED HANDLEBAR*

For cutting edge style, a Chizeled Bar combines the hands-up feel of a mini-ape with the narrow width of a drag bar. The bar’s shoulder-width design keeps the elbows in and the arms straight ahead, and the wrist and hands fall in a neutral palms-down grip.

CHOOSING YOUR HANDLEBAR

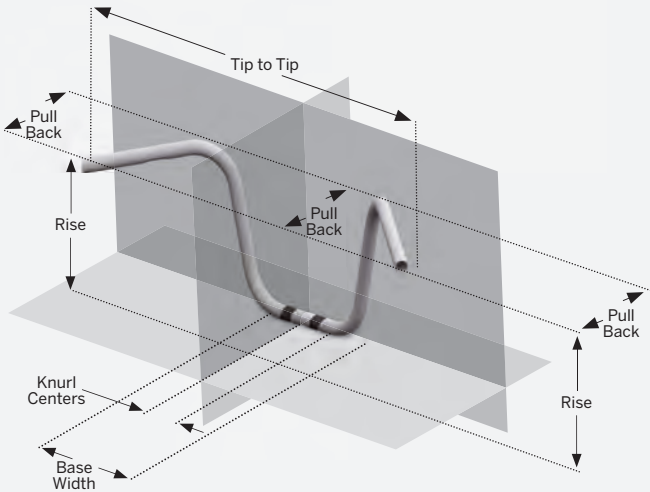

RISE is the vertical distance between a handlebar’s tip and its base. Adding risers to bars that sit too low can help put hand grips into your sweet spot.

PULL BACK is the distance the handlebar tips come back toward the rider. Greater pull back can eliminate the long reach to the bar for a shorter rider.

WIDTH is measured from tip to tip. Make sure the bar isn’t too wide so it pulls your hands off the grips when turning.

KNURL CENTER is the distance between the center line of the bar’s knurling. The measurement should match the riser dimension to maximize clamping pressure.

*NOTE: Installation of some handlebars and risers may require a change in clutch and/ or throttle cable and brake lines for some models. Handlebar height is regulated in many locations. Check local laws to ensure your motorcycle meets applicable regulations.
**1.25" Fat Bar base necks down to fit 1.0" handlebar clamp.

Handlebars – Dyna®/Softail®

A. REACH™ HANDLEBAR* – 1.0"

Recommended for riders between 5’-2" and 5’-8" tall, this Reach Handlebar is shaped to position the hand controls closer to the rider for optimized elbow and wrist position. Designed to provide the ideal balance of pull back and width, this handlebar allows your hands fall naturally in place. The narrower width reduces your stretch while making low-speed turns and parking lot maneuvers, and the overall effect is improved confidence and long-range comfort for short-armed riders.

Fits '18-later FLDE, FLHC, FLHCS, FLSL, FXBB, FXLR, FXST and '21-later FXBBS models. All models require separate purchase of additional installation components.

CHOOSE YOUR BATWING HANDLEBAR
Just about every model of Harley-Davidson® motorcycle features a different stock handlebar. Selected to complement the style or use of the bike, the handlebar may be the ideal shape for many riders, but of course, not everyone has the same physical characteristics.

Choosing a bar for your batwing fairing-equipped model is about more than just style – it’s about how you approach the road. Where the bar positions your hands, wrists and arms directly affects how you feel on your motorcycle. For every set of bars, there are three factors at work: rise, pull back and width. These three measurements determine your reach to the hand controls and, therefore, your overall feeling of comfort and control.

A. ELECTRA GLIDE® CHROME HANDLEBAR*
Replace your stock polished bar with this 1.0", chrome handlebar that allows you to tuck the wires inside the bar for a clean, finished look. Identical shape to the Original Equipment Electra Glide® and Street Glide® bar, this high-quality chrome-plated handlebar is designed to be compatible for use with TGS-equipped Electra Glide® models.

56036-08 Chrome.
Fits '09-later Electra Glide®, Street Glide® (except '23-later FLHX and FLHXSE) and Ultra Limited® models (except CVO™ models). Does not fit Trike models. All models require separate purchase of additional components.

Handlebar Risers

A. SOFTAIL SLIM® PULL BACK RISER KIT*

Ideal for riders with a short reach or for those who prefer an upright riding position, these curved risers and the matching handlebar clamp are shaped to put the Original Equipment Softail Slim® handlebar closer to the rider. Designed for easy installation, these 4.5" high risers are compatible with the stock control cables for a low-cost conversion. Provides 1.75" of rise and 1.5" of additional pull back when compared to the stock FLS riser.

Fits most '12-'17 FLS and FLSS and '18-later FLSTL models. '15-'17 FLS and FLSS models equipped with ABS brakes require separate purchase of Brake Line P/N 41800300. Finish off the look with a Harley-Davidson® decorative handlebar clamp kit.

C. POLYURETHANE HANDLEBAR RISER BUSHINGS

These Handlebar Riser Bushings replace the Original Equipment stacked rubber and zinc washer combination with a long-lasting polyurethane bushing and cover. These firm bushings provide a direct link between the bar and the front fork for a solid feel – and they reduce the softness you experience when a tall or wide handlebar is installed in Original Equipment vibration-isolating rubber mounts.

56298-03A Fits '83-later Touring models. Kit includes replacement bolts. Does not fit Trike models.

56165-03 Fits '97-'03 XL, '86-'17 Dyna® (except '08-'12 FXDB) and '86-'17 Softail® (except Springer™, FXS and FXSTD) models. '86-'93 FL Softail® models require use of '94-later riser bolts. Will not fit with Chrome Riser Cup Washer Kit P/N 56486-01.

*NOTE: Installation of some handlebars and risers may require a change in clutch and/or throttle cable and brake lines for some models. Handlebar height is regulated in many locations. Check local laws to ensure your motorcycle meets applicable regulations.
