ENJOY THE RIDE

The relationship between the seat, the handlebar and the foot controls has an enormous impact on the comfort, control and confidence you feel when riding your motorcycle. Once you’ve picked the bike, it’s time to choose the options that match your ride to your personal dimensions.

For shorter riders, consider tailoring your fit by changing to a Reach® Seat, Mid Foot Controls and lowered suspension height.

For taller riders, consider altering your ride by changing to a Tallboy® Seat and Extended Foot Controls.

ESTABLISH YOUR POSITION AND FEEL

SEATS

Seat height and shape impact rider comfort, fit and confidence. Where the seat positions you relative to the foot controls, hand controls and the ground plays a major role in the quality of your ride.

FOOT CONTROLS

Repositioning your feet can relieve muscle tension, take pressure off the tailbone and reduce fatigue. The correct riding position can add hours of comfort and hundreds of miles to your daily saddle time.

HANDLEBARS

Where the bar positions your arms, hands and wrists directly impacts how you feel on the motorcycle. Choose a bar that falls easily to hand, and does not pull you out of the seat when maneuvering.

STANDARD HEIGHT

SUSPENSION

Adjusting your motorcycle’s ride height by raising or lowering the suspension is often the first step in fitting the bike to your stature. Being sure-footed at a stop can really increase your sense of confidence.

Seating – Reach® & Tallboy®

**A. SUPER REACH® SOLO SEAT**  
Get a little bit closer. Super Reach® forward position seats are designed to move riders with a shorter inseam even closer to the controls and to bring the legs about 1.0" closer together so that your feet rest firmly on the pavement. The scooped bucket-shaped saddle is enhanced with added back support padding to move the rider up to 1.0" lower and 3.0" forward. The combination positions the rider closer to the hand and foot controls to offer both comfort and confidence. For a two-up ride, combine the solo seat with the Touring Passenger Pillion P/N 51404-10 (sold separately).

**54384-11**  
Fits '06-'17 Dyna® models. Seat width 10.5".

The Tallboy Seat also features a wide pillion for added passenger comfort.

Suspension

C. PREMIUM RIDE SINGLE CARTRIDGE FORK KIT\*

This Single-Sided Cartridge Fork provides improved handling performance by keeping the tire in contact with the road surface. Tuned to work in concert with the Premium Emulsion Rear Shocks, the fork damping is controlled by a specifically calibrated piston and valve stack. Unlike typical orifice damping, the piston/valve system helps the cartridge fork achieve a linear damping force curve for consistent feel throughout the compression and extension of the front suspension. The cartridge allows the forks to react quickly to rough roads, inspiring rider confidence in sweeping corners. The compression piston provides excellent low-speed damping for a better rider feel, and the rebound spring provides a smoother feel during topping. The cartridge fork resists bottoming and dive, and the triple rate spring and oil lock allows the forks to absorb bumps even under hard braking – giving the rider more control while resisting wheel hop. A perfect addition during the installation of chrome or gloss black lower fork sliders, the kit includes fork pipe, cartridge, fork bolts, main springs and oil seals.

**45400058**  
Fits '06-'17 Dyna® models (except FLD, FXDWG and '07-'08 FXDSE). Original Equipment on FXDLS models.

**D. PREMIUM RIDE EMULSION SHOCKS\***  
Experience a comfortable and confidence-inspiring ride – no matter the pavement conditions – with Harley-Davidson® Premium Ride Emulsion Shocks. These fast-acting mono-tube nitrogen gas-charged shocks offer enhanced compression and rebound damping control when compared to typical twin-tube shock absorbers. The nitrogen gas charged shocks resist oil aeration and work with the internal valve stack to provide superior damping control in the twisties. The large 36mm pistons and low viscosity high-performance oil allow these shocks to react quickly to impacts and keep the tires tracking the road surface. You get a controlled ride and minimized bottoming harshness transmitted through the frame. The locking threaded adjustment lets you fine-tune the spring preload to your current riding conditions – whether a solo run on the back roads or a fully loaded two-up freeway tour – and urethane bumpers provide a softer feel if the shock bottoms under load. The beautifully finished shocks feature black-anodized billet top caps and black progressively-wound springs. Kit includes left and right shock and preload adjustment spanner wrench.

**54000066** Stock Height.  
Fits '06-'17 Dyna models (except FLD and '07-'08 FXDSE). Original Equipment on FXDLS models.

**\*WARNING:** Installation of any accessory suspension components may affect cornering clearance and jiffy stand operation. This could distract the rider, causing loss of control and death or serious injury.
